To: Alcohol and Tobacco Tax and Trade Bureau
In regards to the proposed new standards for Flavor
Malted Beverages, I urge yo to support option #
2-51-49. This option gives fairness to all
distributors in the market instead for favoring the
larger producers. The 90-10 option will make smaller
producers change the way their product is made and
change the price of the product. Supporting option #2
gives the products a fair chance for all producers.

Thank You

Steve Phillips
