Dear Chief, Regulations and Procedures Division:

I am writing in support of the proposed 0.5 percent standard for flavored malt beverages.

The proposed standard is the best way to maintain clear distinctions between beer and liquor and it is the best way to preserve the flavored malt beverage category.

The alcohol that is produced in a beverage know as "beer" get into the product through an extensive laborious process of fermentation.

It is not fair to classify a product as beer if the alcohol comes from a cheap addition.

Thank you.
