approval of the "0.5%" standard. We support the "0.5%" standard
because it draws a clear distinction between beer & liquor
products and because it will preserve the flavored malt beverage
category. > > The biggest problem with the "51/49"

standard is that it would make the federal regulations contrary to
many state laws. The same products could be a beer in some states
and liquor products in other states. Passing this standard would
be extremely disruptive to the marketplace.
