Dear Sirs

I am sending this in order to urge you to adopt 'Option#2' of the two proposals under consideration. I feel that, as an employee of a beverage wholesaler, it is the more reasonable option from the perspective of the effect the costs of reformulation could have on smaller brewer and whoIesalers. While I believe establishing a new standard makes good sense, the ratio in ' Option #2 is the least disruptive to the marketplace - as it currently exists - as well as to those, like myself, who rely on the success of the products this new standard would impact.

Respectfully,

Alexander J. Kluth II
Operations Manager
