Re: Notice 41

Dear U.S. TTB,

The time is now to allow voluntary nutritional labeling of beverage alcohol.

Consumers want to be informed. Basic information such as alcohol content and serving size will greatly aid the consumer in determining what products to purchase. Voluntary labeling will also aid the consumer in determining the appropriate serving quantity for each beverage.

We strongly urge your support of voluntary nutritional labeling of wines, distilled spirits, and malt beverages.

It's about information. its about responsibility. And it's about time.

Cheers,

A handwritten signature in black ink, appearing to read 'B Swanson'.
