Formulas and Labels for Beer/Malt Beverages

NEW YORK STATE BREWERS CONFERENCE
MARCH 11, 2022
Agenda

- Introduction
- Formulas
- Labels
- Questions
TTB Disclaimer

This information is being presented to help the public to understand and comply with the laws and regulations that the Alcohol and Tobacco Tax and Trade Bureau (TTB) administers.

It is not intended to establish any new, or change any existing, definitions, interpretations, standards, or procedures regarding those laws and regulations.

In addition, this presentation may be made obsolete by changes in laws and regulations.

Please consult the applicable laws and regulations for the most current requirements.

Sample documents (such as records, returns, and labels) are for illustrative purposes only and contain fictitious data.
Formulas for Beer/Malt Beverages

MICHAEL WARREN
ASSISTANT DIRECTOR, FORMULAS OFFICE
Common Formula Questions

• What is a formula?
• Why is a formula required?
• At what stage do I apply for formula approval?
• When is a formula required?
• How do I apply for formula approval?
What is a Formula?

• A formula is the recipe for your beer/malt beverage
  – It must include a quantitative list of ingredients
  – It must include a description of how the product is produced
  – It must indicate a total yield or batch size
  – In some instances a sample of the product must also be submitted to TTB for laboratory analysis

• See Formula Basics page on TTB.gov
Where is the Formula Requirement?

- TTB regulations contain the requirement that formula approval must be obtained for certain products
  - Domestic (27 CFR 25.55)
  - Imported (27 CFR 7.28)
Why is a Formula Required?

• We use the information found in the formula to:
  – Classify the product for tax and labeling purposes
  – Ensure that the product does not contain any prohibited ingredients
  – Determine if limited ingredients are used within prescribed limitations or if they will impact labeling
  – Provide a suggested statement of composition for labeling purposes
At What Stage do I Apply for Formula Approval?

• **Domestic** – Formula approval (if required) must be obtained prior to producing the beer

• **Imported** – Formula approval may be requested prior to or in conjunction with an application for a certificate of label approval
When is a Formula Required?

• Formula approval is required if the brewer uses any of the following ingredients or processes*:
  – Flavors with alcohol
  – Compounded flavors
  – Colors
  – Artificial sweeteners
  – Food materials (unless exempted by Attachment 1 of TTB Ruling 2015-1)
  – The beverage is frozen and ice crystals are removed (e.g., ice beer)

*Not a complete list
Ingredients and Processes that are Exempt from Formula Requirements

- **TTB Ruling 2015-1** exempts certain traditional ingredients and processes when used to make malt beverages.

- **Attachment 1** specifies which ingredients and processes are exempt, for example:
  - Honey, vanilla beans
  - Barrel-aging
Ingredients and Processes that are Exempt from Formula Requirements

- **TTB Ruling 2015-1** does not exempt extracts or flavors containing alcohol
  - Vanilla beans are exempt, but vanilla extract is not exempt
- At least 51% of the fermentable materials must consist of malt or substitutes for malt (rice, grain of any kind, bran, glucose, sugar, and molasses)
- TTB can still request a formula and samples for analysis at any time, even when exempt ingredients are used
Exempt Ingredients and Processes Determined to be Traditional Under TTB Ruling 2015–1

Industry members are responsible for ensuring that all ingredients, including any parts of fruit, used in the production of malt beverages or beer are wholesome products suitable for human food consumption and comply with applicable ingredient safety regulations of the Food and Drug Administration.

<table>
<thead>
<tr>
<th>INGREDIENT</th>
<th>DESCRIPTION/LIMITATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>AGAVE</td>
<td>Whole, juice, puree, or concentrate. <strong>Does not</strong> include extracts, essential oils, or syrups.</td>
</tr>
<tr>
<td>ALLSPICE</td>
<td>As outlined in FDA’s GRAS listing at 21 CFR 182.10. Spices may be whole or ground. <strong>Does not</strong> include extracts, essential oils, or syrups.</td>
</tr>
<tr>
<td>ANISE</td>
<td>As outlined in FDA’s GRAS listing at 21 CFR 182.10. Spices may be whole or ground. <strong>Does not</strong> include extracts, essential oils, or syrups.</td>
</tr>
<tr>
<td>APPLES</td>
<td>Whole, juice, puree, or concentrate. <strong>Does not</strong> include extracts, essential oils, or syrups.</td>

</tr>
</tbody>
</table>
Combinations of Exempt and Non-Exempt Ingredients

Passion fruit, vanilla beans

Guava

If you use both exempt and non-exempt ingredients, formula is required

Guava is not exempt

Passion fruit and vanilla beans are exempt
Which Beers Require Formula Approval?

- Use our online tool Which Alcohol Beverages Require Formula Approval? or check the list in TTB G 2016-1A to learn which beers require formula approval.

Which Alcohol Beverages Require Formula Approval?

For certain distilled spirits, beers/malt beverages, and wines, TTB must evaluate the ingredients and production process before the product can be made or imported, and before you can submit your labels to TTB (if required). In some cases we also analyze a sample of the product in our laboratory while reviewing the formula.

Select your commodity, then answer a few questions about your product and we’ll tell you whether it needs formula approval:
What TTB Looks For When Reviewing Formulas

• Have you used the correct designation (class and type) – Is the base produced according to the stated standard*

• What is the GRAS (Generally Recognized As Safe) status of certain ingredients

*See 27 CFR 7.1, 7.141-7.147, and 25.15
What TTB Looks For When Reviewing Formulas (Cont.)

• Have you used any limited or prohibited ingredients

• Did you submit all the correct supporting documents needed for certain ingredients
  – Ingredient Specification Sheet (Spec Sheet)
  – Flavor Ingredient Data Sheets (FIDS)
  – Limited Ingredient Calculation Worksheet
Flavor Ingredient Data Sheet (FID Sheet or FIDS)

- A **FID Sheet** is a document that includes information about certain ingredients used to make a compounded flavor.
- Submit one FID Sheet for each compounded flavor used in your product.
- See [TTB G 2017-4](#) for additional information and examples.
The FID Sheet allows TTB to:

- Ensure that the compounded flavor has been evaluated by the TTB Nonbeverage Products Laboratory
- Verify that your beverage does not contain any ingredients in excess of the limits prescribed by TTB or by FDA
- Ensure the appropriate labeling of your product
- Ensure your product complies with TTB restrictions governing how much of the alcohol in your beverage may be derived from flavors and other nonbeverage ingredients containing alcohol
Flavor Ingredient Data Sheet (Cont.)
(FID Sheet or FIDS)

- Flavor manufacturer supplies it to the brewer
- FID based on exchange between flavor producer and TTB Nonbeverage Laboratory
- It lists concentration of limited ingredients in PPM
- Lists any colors used in flavor
- States alcohol content of flavor
- This information, combined with the use rate, determines classification of the flavor
TTB Limited Ingredients

• TTB allows 4 artificial flavor materials to be present at certain levels in alcohol beverages without affecting the label declaration:
  – Synthetic maltol
  – Ethyl maltol
  – Synthetic vanillin
  – Ethyl vanillin

• If these limits are exceeded, a natural flavor is treated as an artificial flavor in the product
Limited Ingredient Calculation Worksheets

- **Limited Ingredient Calculation Worksheets** are used to calculate the total amounts of ingredients that have limits on their use per TTB and FDA requirements.

- Complete and submit one for each malt beverage made with one or more compounded flavors.
Limited Ingredient Calculation Worksheets (Cont.)

• Also useful as a product development tool
  – Allows you to confirm that new product formulas are in compliance with limited ingredient requirements, and whether a flavor will be labeled as artificial prior to submitting the formula

• See TTB G 2017-6 for additional information and examples
Beer/Malt Beverages with Flavors that Contain Alcohol

• If final ABV is **less than or equal to 6 percent**:
  – at least 51 percent of the alcohol in the final product must come from ingredients fermented at the brewery
  – no more than 49 percent of the alcohol in the final product can come from the flavors and other nonbeverage materials containing alcohol

27 CFR 7.5, 7.63(a)(3), and 25.15
Beer/Malt Beverages with Flavors that Contain Alcohol (Cont.)

• If final ABV is **greater than 6 percent**:
  – no more than 1.5 percent of the volume of the malt beverage can consist of alcohol from flavors and other nonbeverage ingredients containing alcohol

• An alcohol content statement must appear on the label if any alcohol in the malt beverage was derived from added flavors or other added nonbeverage ingredients (other than hops extract) containing alcohol

27 CFR 7.5, 7.63(a)(3), and 25.15
A spec sheet is a document or label that lists or describes the contents of an ingredient that is made from more than one component. Submit a spec sheet for each ingredient that is made from more than one component, e.g., a fruit juice made from water, apples, and sugar.
• Should not be used for compounded flavors (use FID sheet)

• See [TTB G 2017-3](#) for additional information and examples
FDA Requirements

• FDA has authority over food and ingredient safety
  – Approved Food Additives
    • 21 CFR parts 170-186
  – Generally Recognized as Safe
    • Traditional use in food prior to 1958
    • Scientific determination

• Traditional medicines/dietary supplements are not necessarily GRAS

• Importer/producer is responsible for providing evidence that an ingredient is GRAS
GRAS Ingredients

• GRAS – Generally Recognized As Safe
  – Under sections 201(s) and 409 of the Federal Food, Drug, and Cosmetic Act, any substance that is intentionally added to food is a food additive, that is subject to premarket review and approval by FDA, unless the substance is generally recognized to be safe
  – Using only GRAS ingredients does not impact whether or not a formula is required
Prohibited and Limited Ingredients

- FDA maintains a list of prohibited ingredients at 21 CFR part 189

- Certain non-prohibited ingredients may be used within prescribed limits
  - TTB Limited Ingredients
How Do I Apply for Formula Approval?

• Formulas Online
  – Step-by-step guidance
  – Data validation checks along the way
  – Application status updates via email

• Formulas Online Customer Page

• See webinar presentation: How to Register and Submit Formulas through Formulas Online
Formulas Online Helpful Hints

• Supply a quantitative list of ingredients
• Provide a complete method of manufacture
• Indicate at what stage flavors are added to the product
• Provide the common name and scientific name (genus and species) for any unusual herbal ingredients
• Ensure that ingredients are considered GRAS (generally recognized as safe) or are approved as food additives by the FDA before you submit

• Make sure you’ve uploaded all the applicable supporting documents, e.g., FIDS, Spec Sheet, etc., based on your list of ingredients

Labels for Malt Beverages

KAORI FLORES
ASSISTANT DIRECTOR,
MALT BEVERAGES & DISTILLED SPIRITS LABELING OFFICE
In this session we’ll cover:

- Mandatory label information
- Keg collars
- Prohibited labeling practices

TTB recently published a final rule: “Modernization of the Labeling and Advertising Regulations for Distilled Spirits and Malt Beverages” (87 FR 7526, February 9, 2022)

- This final rule reorganized the label regulations in 27 CFR parts 5 and 7 for clarity and also to provide additional flexibility in labeling products
- This presentation includes updated regulatory citations and requirements
- No changes are required for any currently approved labels
Mandatory Label Information
Mandatory Label Information

The following label information is mandatory:

– **Brand name**  
  (27 CFR 7.64)

– **Alcohol content***  
  (27 CFR 7.65)

– **Name and address**  
  (27 CFR 7.66-7.68)

– **Country of origin** (Imported)  
  (27 CFR 7.69)

– **Net contents**  
  (27 CFR 7.70)

– **Class**  
  (27 CFR 7.141-7.147)

– **Government Health Warning**  
  (27 CFR 16.21-22)

– **Ingredient Declarations** (if used):  
  (27 CFR 7.63)
  • Aspartame
  • FD&C yellow #5
  • Sulfites
  • Cochineal extract or carmine

*Note: Alcohol content is only required for malt beverages containing alcohol derived from added flavors or other nonbeverage ingredients (other than hops extract)) containing alcohol.
Mandatory Label Information
General Requirements

• Must be readily legible under ordinary conditions, and must appear on a contrasting background
• Other than the brand name, must be in English, with exceptions for malt beverages bottled for consumption in Puerto Rico
• For information about type size requirements, refer to
  – 27 CFR 7.53 or
  – TTB Malt Beverage BAM (Beverage Alcohol Manual)
<table>
<thead>
<tr>
<th>PART I - APPLICATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. PLANT REGISTRY/BASIC PERMIT/BREWER'S NO. (Required)</td>
</tr>
<tr>
<td>3. SOURCE OF PRODUCT (Required)</td>
</tr>
<tr>
<td>✓ Domestic</td>
</tr>
<tr>
<td>□ Imported</td>
</tr>
</tbody>
</table>

8. NAME AND ADDRESS OF APPLICANT AS SHOWN ON PLANT REGISTRY, BASIC PERMIT OR BREWER'S NOTICE. INCLUDE APPROVED DBA OR TRADENAME IF USED ON LABEL (Required)
Fake Brewery Name
1234 Road
Arlington, VA

| 4. SERIAL NUMBER (Required) |
| 5. TYPE OF PRODUCT (Required) |
| □ WINE |
| □ DISTILLED SPIRITS |
| ✓ MALT BEVERAGE |

FRONT LABEL:

Example

| 6. BRAND NAME (Required) |

Example

BACK LABEL:

Keep Cold. Drink Responsibly.

GOVERNMENT WARNING: (1) According to the Surgeon General, women should not drink alcoholic beverages during pregnancy because of the risk of birth defects. (2) Consumption of alcoholic beverages impairs your ability to drive a car or operate machinery, and may cause health problems.

Creative Commons-licensed Image

Mandatory Label Information:

1) Brand Name
2) Name and Address
3) Class/Type
4) Net Contents
5) Government Warning
6) Alcohol Content (Optional)
Mandatory Label Information

Brand Name

• Name under which the malt beverage is marketed
• If you do not identify a brand name, then the name of the bottler or importer is considered the brand name

• Common Mistakes:
  – Brand name on the label is not correctly entered on the application
  – Class/type is entered in the brand name field on the application
    • Example:

6. BRAND NAME (Required)
  ALE

27 CFR 7.64
Mandatory Label Information
Name and Address

- City and state of bottler
- Trade name or DBA (doing business as) is allowed
- Principal place of business of the producing brewer may be used in lieu of listing all brewing locations when owning multiple brewing locations
- The place of bottling may also appear in a listing of all breweries owned by the bottler, if the place of bottling is not given less emphasis and the coding requirements of 27 CFR 25.141 and 25.142 are met

27 CFR 7.66-7.68
Name and Address | Common Mistakes

• Name and address are missing from the label
• City and state on label do not match the address on the Brewer’s Notice
• Contract brewer/producer has not added the contractee’s DBA/trade name to their Brewer’s Notice
• Label contains name and address of the contractee and not the contract brewer/producer
Mandatory Label Information

Net Contents

- Must use English units of measure (fluid ounces, pints, quarts, gallons)
- May show both metric and English units on the label
  - 1 pint 9.4 fl. oz. (750 mL)

![Table showing examples of net contents and container sizes.

27 CFR 7.70]
Net Contents | Common Mistakes

• Stating just **oz.** instead of **fl. oz.**
• Stating **16 fl. oz.** instead of **1 pint** (may list both)

<table>
<thead>
<tr>
<th>Acceptable Formats:</th>
<th>Needs Correction:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• 1 Pint</td>
<td>• 16 OZ</td>
</tr>
<tr>
<td>• 1 Pint (473 mL)</td>
<td>• 16 FL OZ</td>
</tr>
<tr>
<td></td>
<td>• 473 mL</td>
</tr>
</tbody>
</table>

• Not converting measurements into pints and fluid ounces (22 fl. oz. vs. 1 pint 6 fl. oz.)
• Showing only metric units (750 mL)
Mandatory Label Information
Alcohol Content

- **Alcohol By Volume:**
  - Mandatory if any alcohol is derived from added flavors or other added nonbeverage ingredients (other than hops extract) containing alcohol
  - Otherwise, it is optional (unless required by state law)
- **Alcohol By Weight:**
  - You may optionally include alcohol by weight together with the statement of alcohol by volume

---

### Approved Formats:

<table>
<thead>
<tr>
<th>Alcohol By Volume:</th>
<th>Alcohol By Weight:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alcohol (ALC) ___% by Volume (VOL)</td>
<td>Alcohol (ALC) ___% by Weight</td>
</tr>
<tr>
<td>Alcohol (ALC) by Volume (VOL) ___%</td>
<td>Alcohol (ALC) by Weight ___%</td>
</tr>
<tr>
<td>___% Alcohol (ALC) by Volume (VOL)</td>
<td>___% Alcohol (ALC) by Weight</td>
</tr>
<tr>
<td>___% Alcohol (ALC)/Volume (VOL)</td>
<td>___% Alcohol (ALC) / Weight</td>
</tr>
</tbody>
</table>

27 CFR 7.65
Alcohol Content | Common Mistakes

• Using an incorrect format
  – **ABV** and **ABW** are not permitted – you must spell out the words or use the abbreviations allowed by 27 CFR 7.65(b)(4)
    
    Example:  
    
    | **5% ABV** | vs. | **5% ALC/VOL** |
    |-----------|-----|---------------|
    | ✗         |     | ✓             |

• Leaving off part of the phrase or the percent symbol (%)
• Not listing alcohol content on the label for products that contain added alcohol from a flavor
Mandatory Label Information

Health Warning Statement

• Must be readily legible under ordinary conditions and on a contrasting background
• Must be separate and apart from all other label text
• The words GOVERNMENT WARNING must appear in capital letters and bold type

GOVERNMENT WARNING: (1) According to the Surgeon General, women should not drink alcoholic beverages during pregnancy because of the risk of birth defects. (2) Consumption of alcoholic beverages impairs your ability to drive a car or operate machinery, and may cause health problems.

27 CFR part 16
Mandatory Label Information
Class and Type - General

• The specific identity of a malt beverage
• The designation of malt beverages is based on trade understandings of the characteristics generally attributed to the particular malt beverage
  – Ale, Beer, Malt Liquor, Stout, and Porter are all acceptable as the class designation of a malt beverage

27 CFR 7.141
IPA is not sufficient as a class/type statement. Ale or India Pale Ale must appear on the brand label.

IPA is not sufficient as a class/type statement. Ale or India Pale Ale must appear on the brand label.

The class designation (ale, stout, etc.) is missing. [Beer with a colon is considered a heading, and not a class/type.]

Dunkelweizen and styles, such as Hefeweizen, Bock, Tripel, Bier, etc. are not sufficient class designations in and of themselves, and need to be further qualified by adding Ale, Beer etc. afterwards.

The class designation (ale, stout, etc.) is missing. [Beer with a colon is considered a heading, and not a class/type.]
Mandatory Label Information
Class and Type – Malt Beverage Specialty Products

- Products not known to the trade under a particular designation are commonly called **malt beverage specialty products**

- MB specialty products generally require formula approval prior to applying for label approval, unless they have been specifically exempted from formula approval

27 CFR 7.141
• If formula approval is required, the product must be labeled with a distinctive or fanciful name, together with an adequate and truthful statement of the composition.

Hazelnut Porter – Porter Brewed with Hazelnuts

- Fanciful name
- Statement of Composition

27 CFR 7.147
MB Specialties that Require Formulas | Common Mistakes

• Fanciful name is missing on the label and/or application
• Statement of composition does not accurately reflect the flavoring materials in the product as per the formula
• Statement of composition is missing the base beer
  – For example, Made with Vanilla Extract vs. Ale with Vanilla Extract
The fanciful name is missing. On formulated malt beverages, a fanciful name is required to appear on the brand label.

The label must have a statement of composition that identifies the products class and type, which is currently missing. A designation does not satisfy this requirement because the product is formulated.
Mandatory Information
Class and Type – Formula Exempt MB Specialties

• Specific malt beverage ingredients and processes are exempt from formulas under TTB Ruling 2015-1
• The process of aging beer is exempt, however DS or wine barrels, woodchips, or staves must have no discernible quantity of spirits or wine

• Labeling Requirements:
  – Class/type may be stated as either a Designation or Statement of Composition
  – Fanciful Names are not required
  – Aging of a product does not need to be called out as part of the class/type

<table>
<thead>
<tr>
<th>Flavoring Ingredient used:</th>

### Examples of Adequate and Inadequate Designations in Accordance with Trade Understanding

| Description of product | Examples of statements of composition that will continue to be allowed as designations in accordance with trade understanding under this ruling. | Examples of adequate designations in accordance with trade understanding. | Examples of inadequate and misleading designations.*  
(Examples of inadequate designations are in black and misleading designations are designated as such and appear in red.) |
|------------------------|-----------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Beer brewed with cherry juice | • Beer brewed with cherry juice  
• Malt beverage fermented with natural flavor  
 (*Kriek may be added as optional additional information.*) | • Fruit beer  
• Cherry beer  
 (*Kriek may be added as optional additional information.*) | • Cherry delight  
• Kriek  
• Bob’s Beer  
• Beer  
• Malt beverage |
| Beer with cherry juice added after fermentation | • Beer flavored with cherry juice  
• Malt beverage with natural flavor added  
 (*Kriek may be added as optional additional information.*) | • Fruit beer  
• Cherry beer  
 (*Kriek may be added as optional additional information.*) | • Cherry delight  
• Kriek  
• Bob’s Beer  

* Misleading designation:  
• Beer brewed with cherry juice |
This label does not have a class and type statement or designation in accordance with TTB Ruling 2015-1.

Examples of acceptable designations/statement of composition:

- ALE WITH RASPBERRIES
  FRUITY & FRESH

- FRUIT ALE
  RASPBERRY PUREE

- RASPBERRY ALE

Image from canva.com/templates/labels
MB Specialties Exempt from Formulas | Common Mistakes

- Product ingredients are not sufficiently conveyed by the style’s name, for example, as *gose* or *wit*
- Statement of composition or designation is missing
- Class designation of base product is missing in the statement of composition

**Acceptable:** ☺
Ale with Blueberries

**Needs Correction:** ☹
Made with Blueberries
Geographical Names
Class and Type

• Geographical names for distinctive types of malt beverages shall not be applied to malt beverages produced in any place other than the particular region indicated by the name unless qualified with text such as **STYLE** or **PRODUCT OF THE USA** or other text to indicate the true place of production.

• Common Mistakes
  – **India Pale Lager** or **India Session Ale** appearing without qualifiers (such as **Style** or **Product of USA**)
  – **Product of the USA** does not appear in direct conjunction with the geographically significant reference (text or imagery)

27 CFR 7.146
### Geographical Names of Distinctive Types

#### Class and Type

<table>
<thead>
<tr>
<th>Names that have lost geographic significance (no qualifier required)</th>
<th>Examples of names that still have geographic significance* (qualifier required)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• India Pale Ale</td>
<td>• Belgian</td>
</tr>
<tr>
<td>• Baltic Porter</td>
<td>• Berliner</td>
</tr>
<tr>
<td>• Bohemian</td>
<td>• English</td>
</tr>
<tr>
<td>• Russian Imperial Stout</td>
<td>• Irish</td>
</tr>
<tr>
<td>• Imperial Russian Stout</td>
<td>• Kolsch</td>
</tr>
<tr>
<td>• Scotch Ale</td>
<td>• Mexican</td>
</tr>
<tr>
<td>• Scottish Ale</td>
<td>• Vienna</td>
</tr>
<tr>
<td></td>
<td>• New England</td>
</tr>
<tr>
<td></td>
<td>• West Coast (or similar)</td>
</tr>
</tbody>
</table>

*Not a Complete List
Unlike India Pale Ale, India Pale Lager has not lost its geographic significance. Geographically significant malt beverage styles produced in a country other than the one indicated must be properly qualified with style or a phrase such as Product of USA.
Keg Collars
Kegs

- Kegs are consumer containers, just like bottles or cans
- When a COLA is required, mandatory labeling requirements must be met
- Labels bearing mandatory information may include:
  - Keg caps
  - Collars
  - Stickers
  - Combination of formats
- Information can be handwritten on the label
  - Except for GOVERNMENT WARNING
Kegs | requirement for firmly affixed labels

• Generally, keg labels must be firmly affixed such that they can’t be removed without the application of water or other solvents.

• However, for kegs with a capacity of at least 5.16 gallons, labels are also considered firmly affixed when they would be broken or otherwise rendered not reusable upon removal.

• Additionally, such keg labels need not be firmly affixed if the name of the bottler or importer is permanently or semi-permanently stated on the keg (e.g., via embossing, engraving, stamping, or a sticker or ink jet printing).

• Keg labels that merely repeat mandatory information already on the container via a firmly affixed label need not be firmly affixed.

• Note: there is no exception for firmly affixing the GOVERNMENT WARNING.

27 CFR 7.51 and 7.61(a)(5)
The Government Health Warning is not compliant. The S and G in Surgeon General must be capitalized. Also, a comma must appear after General and machinery.

The alcohol content cannot be left blank and must be listed in the identified section. However, it is an allowable revision post approval.

When multiple class and type designations are present on keg labels, you are required to designate the product to which the application applies.

Irish is geographically significant and must be further qualified (e.g. Irish-Style). Cream and Wit are missing the Class/Type designation at the end.
Prohibited Labeling Practices
Examples of Things Prohibited from Appearing on Malt Beverage Labels

• Any statement that is false or untrue

• Any statement ... relating to any guarantee (except money-back guarantees are permitted)

• Any misleading information, such as:
  – Text that implies that the product is a distilled spirit or contains a distilled spirit (with certain exceptions)
  – Misleading health-related claims
  – Implied government endorsements

27 CFR 7.102, 7.123, and 7.126-7.130
