make available to all competing retailers any plan providing promotional payments or services to retailers. With these requirements met, a packer can claim the area of its promotion. However, this section is not intended to deal with the question of a packer's liability for use of an area promotion where the effect may be to injure the packer's competition.

5. Wholesaler or third party performance of packer's obligations. A packer may, in good faith, enter into written agreements with intermediaries, such as wholesalers, distributors or other third parties, including promotional or promotional plans, which provide that such intermediaries will perform all or part of the packer's obligations under this part. However, the interposition of intermediaries between the packer and its customers does not relieve the packer of its ultimate responsibility of compliance with the provisions of the Packers and Stockyards Act. The packer, in order to demonstrate its good faith effort to discharge its obligations under this part, should include in any such agreement provisions that the intermediary will:

(1) Give notice to the packer's customers in conformity with the standards set forth in items 3(e) and (d), supra;

(2) Check customer performance in conformity with the standards set forth in item 3(e), supra;

(3) Implement the plan in a manner which will assure its functional availability to the packer's customers in conformity with the standards set forth in item 3(c), supra (This must be done whether the plan is one devised by the packer itself or by the intermediary for use by the packer's customers); and

(4) Provide certification in writing and at reasonable intervals that the packer's customers have been and are being treated in proportionally equal treatment, the packer's actions must be done whether the plan is one devised by the packer itself or by the intermediary for use by the packer's customers.

A packer who negotiates such agreements with its wholesalers, distributors or third party promoters will be considered by the Administrator to have justified its "good faith" obligations under this section only if it accompanies such agreements with the following supplementary measures: At regular intervals the packer takes affirmative steps to verify that its customers are receiving the proportionally equal treatment to which they are entitled by making spot checks designed to reach a representative cross section of its customers. Whenever such spot checks indicate that the agreements are not being implemented in such a way that its customers are receiving such proportionally equal treatment, the packer takes immediate steps to expand or to supplement such agreements in a manner reasonably designed to eliminate the repetition or continuation of any such discriminations in the future.

Intermediaries, subject to the Packers and Stockyards Act, administering promotional assistance programs on behalf of a packer may be in violation of the provisions of the Packers and Stockyards Act, if they have agreed to perform the packer's obligations under the Act with respect to a program which they have represented to be usable and suitable for all the packer's competing customers if it should later develop that the program was not offered to all or, if offered, was not usable or suitable, or was otherwise administered in a discriminatory manner.

6. Customer's liability. A customer, subject to the Packers and Stockyards Act, who knows, or should know, that it is receiving payments or services which are not available on proportionally equal terms to its competitors engaged in the resale of the same packer's products may be in violation of the provisions of the Act. Also, customers (subject to the Packers and Stockyards Act) that make unauthorized deductions from purchase invoices for alleged advertising or other promotional allowances may be proceeded against under the provisions of the Act.

Example: A customer subject to the Act should not induce or receive an allowance in excess of that offered in the packer's advertising for any area promotion done at "vendor rates" or for any other amount in excess of that authorized in the packer's promotion program.

7. Meeting competition. A packer charged with discrimination under the provisions of the Packers and Stockyards Act may defend its actions by showing that the payments were made or the services were furnished in good faith to meet equally high payments made by a competing packer to the particular customer, or to meet equivalent services furnished by a competing packer to the particular customer. This defense, however, is subject to important limitations. For instance, it is insufficient to defend solely on the basis that competition in a particular market is very keen, requiring that special allowances be given to some customers if a packer is "to be competitive."

8. Cost justification. If is no defense to a charge of unlawful discrimination in the payment of an allowance or the furnishing of a service for a packer to show that such payment or service could be justified through savings in the cost of manufacture, sale, or delivery. (Approved by the Office of Management and Budget under control number 0590-0001)

BILLING CODE 3410-KD-M

DEPARTMENT OF THE TREASURY
Bureau of Alcohol, Tobacco and Firearms
27 CFR Part 9
[Notice No. 757; 92-F-014P]

Texas High Plains Viticultural Area
AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is considering the establishment of a viticultural area located in Northwest Texas to be known as "Texas High Plains." This proposal is the result of a petition filed by Clinton M. McPherson of Lubbock, Texas.

ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising allows wineries to designate the specific areas where the grapes used to make the wine were grown and enables consumers to better identify the wines they purchase.

DATES: Written comments must be received by November 16, 1992.

ADDRESSES: Send written comments to: Chief, Wine and Beer Branch: Bureau of Alcohol, Tobacco and Firearms; P.O. Box 30221; Washington, DC 20091-0221; Attn: Notice No. 757.

FEDERAL ELECTION COMMISSION
11 CFR Parts 109, 110 and 114
[Notice 1992-16]

Independent Expenditures; Corporate and Labor Organization Expenditures

AGENCY: Federal Election Commission.

ACTION: Change in MCFL public hearing time.

SUMMARY: On July 29, 1992, the Commission published proposed regulations that would implement the Supreme Court's opinion in Federal Election Commission v. Massachusetts Citizens for Life, Inc., 479 U.S. 238 (1986). See 57 FR 35348. The Notice of Proposed Rulemaking announced that a public hearing would be held on October 14 and 15, 1992 at 10 a.m. The Commission has decided to change the starting time for the public hearing to 9:30 a.m. on both days. The additional time is necessary to accommodate all the witnesses who wish to testify.

DATES: The Commission will hold the hearing on October 14, 1992 at 9:30 a.m. and on October 15, 1992 at 9:30 a.m.

ADDRESSES: The hearing will be held at the Federal Election Commission, Ninth Floor Hearing Room, 999 E Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463. (202) 219-3600 or toll free (800) 424-9530.

Scott E. Thomas.
Vice Chairman, Federal Election Commission.

BILLING CODE 6715-01-M

DEPARTMENT OF THE TREASURY
Bureau of Alcohol, Tobacco and Firearms
27 CFR Part 9
[Notice No. 757; 92-F-014P]
SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR part 4. These regulations allow the establishment of definite American viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin in the labeling and advertising of wine.

On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new part 9 to 27 CFR, providing for the listing of approved American viticultural areas. Section 4.25a(e)(1), title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in subpart C of part 9. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

The petition should include:

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;
(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;
(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;
(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and
(e) A copy of the appropriate U.S.G.S. map(s) with the boundaries prominently marked.

Petition

ATF has received a petition from Clinton M. McPherson proposing to establish a viticultural area in the Texas panhandle to be known as “Texas High Plains.” The proposed viticultural area contains approximately 8 million acres of flat, intensively cultivated land with cotton, sorghum and wheat the predominant crops, irrigated from the Ogallala aquifer. The elevation is from 3,000 to 4,000 feet above sea level. Vineyards presently occupy approximately 2,000 acres, but the petitioner maintains that there is growing interest in viticulture in the area. There are presently 4 wineries active within the proposed area. Nearly half of all commercial wine grapes grown in Texas are grown in the proposed area. The petitioner states many wines from Texas High Plains grapes are achieving high accolades in national and international competitions. He attributes the excellent quality to the “Texas High Plains” high elevation, cool nights, rich soils, dry, disease free conditions, and constant breezes.

Evidence of Name

The petitioner submitted evidence that the name “Texas High Plains” is used to refer to a large portion of the Texas panhandle and that the area specified in the petition is within the larger area locally or nationally known by that name. The evidence includes:

- A Texas Highway Department poster which shows a map of the State of Texas, with a shaded area in the northwest portion of the state designated as the Texas High Plains.
- The east and west boundaries of the shaded area agree with the proposed boundaries, though the shaded area extends further to the north and south than the proposed area.
- The Los Angeles Times, June 1, 1987, edition carried an article titled “Texas Wine: Taste it and Believe It” which described several wineries on the “Texas high plains”—Pheasant Ridge and Llano Estacado, both within the proposed area.
- The Spirit magazine, September, 1986, edition carried an article titled “The Wine Industry—Coming of Age in Texas?” which referred to the High Plains as an area in which the soil would be compatible with European vines.

Evidence of Boundaries

Evidence that the boundaries of the proposed area are as specified in the petition includes the following:

- The Fall, 1991, Market Report, a publication of the Texas Wine Marketing Research Institute, Texas Tech University, contains a map of the grape growing regions in Texas as broken down by counties. The western boundary agrees with that proposed, but the area shown on the map extends further to the north and slightly further to the east and south.

The 1986-87 Texas Almanac and State Industrial Guide published a map of the “vegetational areas” of Texas, showing the High Plains as a somewhat larger area than the one proposed, interrupted by a strip of “rolling plains” along the northern boundary of the proposed area.

The Texas Water Plan, published by the Texas Water Development Board in November, 1986, contains a map showing Texas climatological divisions, including the High Plains. The eastern boundary agrees with that proposed, but the area shown on the map extends further to the west, north and south.

According to the petitioner, the proposed boundaries omit portions of the larger area known as the “Texas High Plains” because they have been found to be unsuitable for commercial viticulture. The petitioner reports that, over the last 20 years, the area has found to be unsuitable for commercial viticulture. The petitioner reports that, over the last 20 years, the area has 100 foot elevation of these areas, higher than most of the proposed area.

In many of the narrative descriptions and maps submitted with the petition, an escarpment called the “Caprock” is used as the eastern boundary of the Texas High Plains. Since this escarpment is not represented on the U.S.G.S. maps as a single line, the petitioner has selected the 1,000 foot contour line as the eastern boundary for the proposed area. This contour line runs to the west of the escarpment; in some places it appears to be as much as 15 miles to the west.

The southern boundary of the proposed area was chosen by the petitioner because, he states, it corresponds to changes in temperature, soil type and wind which alter the growing conditions significantly. His evidence will be discussed further in the sections on soil and climate.

Viticultural History

Records of the Texas Agricultural Experiment Station in Lubbock show studies were done between 1909 and 1937 on the adaptability of many grape cultivars, including vitis vinifera, at the station. In the 1950s and ’60s, French-American hybrids, American and
vinifera cultivars were planted in research plots at Texas Tech University, also in Lubbock. As a result of this work, commercial viticulture began in the area in 1945, and was expanded in the 1960s and into 1973. Llano Estacado, the first winery in the area, had its first crush in 1976. Three more wineries have been developed in the Texas High Plains since then: Pheasant Ridge, Teysya and La Escarbada XIT.

In a report on the 1985 Lone Star State Wine Competition, Greater Lubbock, in its November, 1985, issue, noted that wineries within the proposed area won the only gold medal awarded, 60% of the silver medals, and nearly 40% of the bronze medals in the statewide competition. The Los Angeles Times, Monday, June 1, 1987, article, "Texas Wine: Taste It and Believe It" mentioned awards won by Llano Estacado and Pheasant Ridge at the 1986 San Francisco Fair and Wine Competition, competing against nearly 2,000 other wines, "including a bunch from California."

Geographical Features

The petitioner provided the following evidence relating to features which he contends distinguish the proposed viticultural area from the surrounding areas:

Topography

The petition states that the proposed area is distinguished from the surrounding area in part by its elevation. According to the petitioner, the most pronounced change in terrain occurs at the proposed eastern boundary of the area where an escarpment "provides an east facing wall 200-1,000 feet high along the entire east boundary of the proposed appellation, separating the Texas High Plains from the Rolling Plains to the east." The proposed area is described in the Texas Almanac as the "largest level plain of its kind in the United States." The high plains rise gradually from 3,000 feet in the east to more than 400 feet in spots along the New Mexico border.

Underlying the Texas High Plains is the Ogallala Aquifer. The Texas Almanac notes that this is an important source of irrigation water for crops grown in the area. The area has no major rivers, but there are numerous "playas" (small intermittent lakes) scattered through the area which catch water after rains and allow it to percolate back to the aquifer.

Soil

The authors of Our Texas, Ralph W. Steen and Frances Donecker, state that the High Plains were considered a "great American desert," suitable only for grazing, until late in the nineteenth century, when the land was found to be fertile. According to a report on Conservation Tillage issued by the Texas Agricultural Experiment Station (TAES) in July, 1987, soils in the proposed area vary from predominantly brown clay loams with clay textured subsoils in the north to fine sandy loams in the central and southern regions. The Ogallala aquifer, which supports irrigation within the proposed area, ends near the proposed southern boundary. The lack of available groundwater results in soils which are sandy, shallow and highly eroded to the south and east of the proposed area. The petitioner told of one vineyard south of the proposed boundary which was abandoned due to drifting sand.

Climate

According to the petitioner, the proposed area is characterized by low annual rainfall, moderate temperature, and variable, but gentle, wind.

According to a report on Irrigation Water Management by the Texas Water Resources Institute in August, 1987, average annual rainfall within the proposed area varies from 14 inches near the western boundary to 20 inches in the east. The report notes that the greatest monthly rainfall in the area occurs between May and September, a fact the petitioner attributes to warm moist air carried into the area from the Gulf of Mexico. This tropical air sometimes brings moderate to heavy thunderstorms with hail and intense winds. According to a chart from TAES, annual precipitation gradually increases to the east of the proposed area, and decreases to the west.

Other charts from TAES compare the average temperatures in various parts of Texas. Mean annual temperature varies from 58° on the north to 61° on the south of the proposed area, a range which the petitioner claims is important to the quality potential of wine grapes. The proposed viticultural area's coldest temperatures range just above and below 0°, with colder temperatures to the north, and warmer temperatures to the south. According to the petitioner, growers to the north of the proposed boundary have abandoned plantings due to frequent freeze loss.

The petitioner also notes that, due to the low relative humidity on the High Plains, there is a very low incidence of such disease and pest problems as downy mildew, Pierce's disease, phylloxera, and black rot, which are found in other parts of Texas.

Proposed Boundary

The boundary of the proposed Texas High Plains viticultural area may be found on six United States Geological Survey (U.S.G.S.) maps with a scale of 1:250,000. The boundary is described in § 9.144.

Executive Order 12291

It has been determined that this proposed regulation is not a major regulation as defined in Executive Order 12291 and a regulatory impact analysis is not required because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required because the proposal, if promulgated as a final rule, is not expected (1) to have secondary, or incidental effects on a substantial number of small entities; or (2) to impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law 96-511, 44 U.S.C. chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this notice of proposed rulemaking because no requirement to collect information is proposed.

Public Participation

ATF requests comments from all interested parties. We particularly request comments concerning the name and boundaries of the proposed area. The area described in the petition is very large, but the evidence shows that the name "High Plains" applies to a much larger area which extends beyond the borders of the State of Texas to the west and north, and further south within the State. The use of the name "Texas High Plains" to describe the proposed area is only warranted if there is a
difference in growing conditions which
collides with the political boundaries.
We are also concerned that use of the
name "Texas High Plains" for a
viticultural area which is smaller than
the area commonly called by that name
may tend to confuse consumers. We
request comments as to whether there
are areas suitable for viticulture within
the larger area known as "Texas High
Plains" which would be excluded from
the proposed viticultural area.
Commenters who believe a potential for
confusion exists should suggest
alternate names for the proposed area.

Comments received on or before the
closing date will be carefully
considered. Comments received after
that date will be given the same
consideration if it is practical to do so,
but assurance of consideration cannot
be given except as to comments
received on or before the closing date.

ATF will not recognize any comment
as confidential. Comments may be
disclosed to the public. Any material
which a commenter considers to be
confidential or inappropriate for
disclosure to the public should not be
included in the comment. The name of
the person submitting a comment is not
exempt from disclosure. During the
comment period, any person may
request an opportunity to present oral
testimony at a public hearing. However,
the Director reserves the right to
determine, in light of all circumstances,
whether a public hearing will be held.

Drafting Information
The principal author of this document
is Marjorie D. Ruhl, Wine and Beer
Branch, Bureau of Alcohol, Tobacco and
Firearms.

List of Subjects in 27 CFR Part 9
Administrative practices and
procedures, Consumer protection,
Viticultural areas, and Wine.

Authority and Issuance
Title 27, Code of Federal Regulations,
part 9, American Viticultural Areas, is
amended as follows:

PART 9—AMERICAN VITICULTURAL
AREAS

Paragraph 1. The authority citation for
part 9 continues to read as follows:

Par. 2. Subpart C is amended by
adding § 9.144 to read as follows:

Subpart C—Approved American
Viticultural Areas
§ 9.144 Texas High Plains.
(a) Name. The name of the viticultural
area described in this section is "Texas
High Plains."
(b) Approved maps. The appropriate
maps for determining the boundary of
the Texas High Plains viticultural area
are six U.S.G.S. topographical maps of
the 1:250,000 scale. They are titled:
(1) "Clovis, New Mexico; Texas" 1954,
(2) "Brownfield, Texas; New Mexico"
(3) "Hobbs, New Mexico; Texas" 1954,
(4) "Plainview, Texas" 1954, revised
1974.
(5) "Lubbock, Texas" 1954, revised
1975.
(6) "Big Spring, Texas" 1954, revised
1975.
(c) Boundary. The Texas High Plains
viticultural area is located in Armstrong,
Bailey, Borden, Briscoe, Castro,
Cochran, Crosby, Dawson, Deaf Smith,
Dickens, Floyd, Gaines, Garza, Hale,
Hockley, Lamb, Lubbock, Lynn, Motley,
Parmer, Reed, Swisher, Terry and
Yoakum Counties, Texas. The boundary
is as follows:
(1) Beginning on the Hobbs, New
Mexico, Texas map at the intersection
of the Texas-New Mexico border and
U.S. Route 180 east of Hobbs, New
Mexico.
(2) The boundary follows U.S. Route
180 east through Seminole, Texas and
onto the Big Spring, Texas, U.S.G.S. map
where it intersects with the 3000 foot
contour line in the town of Lamesa;
(3) The boundary then follows the
3000 foot contour line in a generally
northeasterly direction across the
U.S.G.S. maps of Big Spring and
Lubbock, Texas.
(4) The boundary continues along the
3000 foot contour line onto the map of
Plainview, Texas, where it follows a
generally northwesterly direction until it
intersects with State Highway 217
approximately 12 miles east of Canyon,
Texas;
(5) The boundary then follows State
Highway 217 west to Canyon, Texas,
leaves State Highway 217 and proceeds
in a straight line in a northwesterly
direction until it intersects with U.S.
Route 60, still within Canyon, Texas;
(6) The boundary then follows U.S.
Route 60 in a southwesterly direction
onto the U.S.G.S. map of Clovis, New
Mexico, Texas, where it intersects the
Texas-New Mexico border;
(7) The boundary then follows the
Texas-New Mexico border south, across
the U.S.G.S. map of Brownfield, Texas;
New Mexico, to the beginning point on
the Hobbs, New Mexico: Texas, U.S.G.S.
map.

Stephen E. Higgins,
Director.

BILLING CODE 4404-01-44

ENVIRONMENTAL PROTECTION
AGENCY

40 CFR Part 52
[LA-4-1-5207; PRL-4515-4]

Approval and Prolongation of Air
Quality Implementation Plans
Louisiana; Correction of Deficiencies
In VOC RACT Rules

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: This notice proposes to
approve the revisions to the State of
Louisiana's air quality regulations
concerning reasonably available control
technology (RACT) for sources emitting
volatile organic compounds (VOC)
under Section 110(a)(1) of the Clean
Air Act. Additionally, this notice
proposes to approve the revisions to the
State's regulatory code. This action is
necessary for several reasons. First, on
May 26, 1988, EPA notified the State
of Louisiana that its SIP for attaining
the national ambient air quality standard
(NAQS) for ozone was substantially
inadequate as applied to the seven
parishes comprising the Baton Rouge
ozone nonattainment area: Ascension,
East Baton Rouge, Iberville, Livingston,
Pointe Coupee, St. James, and West
Baton Rouge. This notice called for the
State to correct deficiencies in its
Volatile Organic Compound (VOC)
RACT rules as they applied to those
parishes. Second, on November 8, 1989,
EPA notified Louisiana that its ozone
SIP was substantially inadequate as it
applied to Calcasieu Parish, which
comprises the Lake Charles ozone
nonattainment area, and also called for
the State to correct existing
deficiencies in its VOC RACT rules as
these applied to Calcasieu Parish. Third,
the Clean Air Act, as amended on November 15, 1990,
required the State to revise its SIP to
correct VOC RACT deficiencies within
six months of enactment. Finally, the
VOC RACT rules must be revised to
provide consistency between the State's
code and the SIP. The effect of today's
proposed action will be to correct
existing deficiencies in the VOC RACT
rules of the Louisiana SIP as required by
