What’s New in COLAs Online 3.4 (Industry Members)

January 10, 2011

The following enhancements in functionality and interface are included in Version 3.4 of the COLAs Online system:

- **TTB Online Portal Access** – Authenticated users may now log on to COLAs Online or Formulas Online from the same main page: TTB Online Portal. (Remember, you have to submit a new registration form if you want access to Formulas Online).

- **Update My Profile** – COLAs Online users may now set authentication questions and answers, as well as modify your user registration, on the *My Profile* page. These authentication questions allow COLAs Online users to set your own password, even if you have forgotten it, without contacting the TTB Help Desk for assistance.

- **Create a New User Registration** – People interested in registering to use COLAs Online may now submit the registration request form electronically. Existing COLAs Online users may also now **Modify User Registration** to make changes to your account, for example to add or delete permits or to modify a user’s role.

- **Activate a User ID** – Once TTB processes your registration and notifies you of your user ID, new COLAs Online users may now activate your own user ID.

- **Set New or Forgotten Password** – Online users may now set new or forgotten passwords yourselves. Existing COLAs Online users must **Update Your Profile** to set authentication questions and answers in order to use this feature.

- **Deactivate Permit Access** – COLAs Online users may now submit a modification to a user registration to deactivate access to a company’s data.

- **Formulas Online** – There is a new *Formulas Online* menu option that allows COLAs Online users who also have registered to use Formulas Online to jump to that system.
