COLAs Online

What’s New in COLAs Online 4.1 (Industry Members)

The following system updates and new functionalities are included in Version 4.1 of the COLAs Online system:

- **Upload DOCX document type** – In addition to previously supported .doc, COLAs Online now accepts .docx documents types as well.
• **Discontinue support for TIFF images** – COLAs Online will now only accept JPEG type images (.jpg, .jpeg, .jpe). Trying to upload a TIFF type image will result in an error.

• **Domestic Sake update** – We have closed a loophole that, under certain circumstances, could allow a holder of a singular Brewer’s permit (BRE) to submit a Wine application, without checking the “Domestic Sake Application” box. In this scenario, trying to proceed from Step 1 of the application, will trigger an error message about the incompatibility between permit and type of product.
