

COLAs Online

What's New in COLAs Online 4.12 (Industry Members)

The following system updates and new functionalities are included in Version 4.12 of the COLAs Online system:

 Low file size image detection – Industry members may now see an error message if they upload an image with the low file size. In step 3 of the COLA application, after Industry member uploads an image, if image has low file size then the image will be detected and the error message will be displayed. Any images with the file size of less than 5kb for Neck/Strip and less than 50kb for Back, Brand (front), Keg collar and Other image types will be detected. In addition to the error message, Industry members will not be able to upload the image.

Low Pixels image detection – Industry members may now see an error message if they upload an image with a total low pixel area. In step 3 of the COLA application, after Industry member uploads an image, if the image has a low number of total pixels (measured by multiplying the pixel width and height) then the image will be detected and the error message will be displayed. Any images with total pixels less than 50k for Neck/Strip and less than 100k for Back, Brand (front), Keg collar and Other image types will be detected. In addition to the error message, Industry members will not be able to upload the image.
