1 INTRODUCTION

This COLAs Online Industry Member User Manual provides information on how to operate the COLAs Online system for authenticated users. The COLAs Online system allows for the submission and tracking of Applications for and Certification/Exemption of Bottle/Label Approval via TTB F 5100.31. This document is written on behalf of the Advertising, Labeling and Formulation Division (ALFD), Office of the Chief Information Officer (OCIO), Alcohol and Tobacco Tax and Trade Bureau (TTB).

This section provides information on the project background, project objectives, and points of contact, as well as the document organization and conventions.

1.1 BACKGROUND

The TTB mission is to:

- Collect alcohol, tobacco, firearms, and ammunition taxes
- Ensure that alcohol beverages are labeled, advertised and marketed in accordance with the law
- Administer the laws and regulations in a manner that protects the revenue, protects the consumer, and promotes voluntary compliance

The ALFD mission is to:

- Ensure the proper tax classification of alcohol beverages
- Ensure that formulas, labels, and advertisements for alcohol beverages are in compliance with Federal laws and regulations
- Ensure that labels provide consumers with adequate information on the identity and quality of alcohol beverage products
- Prevent consumer deception
- Educate and provide guidance to industry and the public on laws, regulations, and activities regarding ALFD’s mission and functions

1.2 PURPOSE AND SCOPE

The purpose of the COLAs Online Industry Member User Manual is to provide a brief understanding of how to operate and navigate through the COLAs Online system.

The COLAs Online system is the authenticated system requiring username and password to submit applications, search for applications or change profile information.

This manual discusses who should use this manual and reviews the menu options, screens available and step-by-step procedures for the system interfaces.

This manual is intended to provide information on how to use the system for external authenticated users of COLAs Online (registration required). There are two types of external authenticated users:

- **External User** – The registered industry member (IM) submits the COLA application electronically and views the status of the application.
- **External Preparer/Reviewer User** – The user with this classification is responsible for creating COLA applications, but does not have the ability to submit, withdraw, or surrender an application.

   ►Note: This indicates if the finished alcohol beverage was produced in the US or internationally.

4. Select the Type of Application- Certificate of Label Approval or Certificate of Exemption from Label Approval.

   ►Note: Certificate of Label Approval is the default.

   ►Note: If you select Certificate of Exemption from Label Approval, select the state the product will be sold in from the drop-down list. If you select Certificate of Label Approval with Source of Product as Imported, the state drop-down list will be disabled.

5. If this is a resubmission of a previously rejected application, select the TTB ID from the drop-down list or enter the TTB ID in the field provided.

   ►Note: “No” is the default.
►Note: If you select “Yes,” you must select or enter a TTB ID.

►Note: The drop-down list contains rejected e-applications.

►Note: The text field allows you to enter the TTB ID of an electronic or paper application that was rejected within the past two years.

6. Select the Next button to proceed to the next step in the create process. See Section 3.6.1.3 Step 2 of 3: COLA Information.

The operating name is listed on the permit and the DBA must be registered with the NRC before use.

6. Enter the Brand Name.

7. Enter the Fanciful Name, if applicable.

►Note: Do not enter a Product Class/Type or Wine Appellation in the Brand Name or Fanciful Name field. You are not required to tell TTB the class/type designation that appears on your label. Putting this information in the Brand Name or Fanciful Name field (or any other field) will result in your application being returned to you for correction.

8. If you have an approved TTB Formula ID, select the appropriate TTB Formula ID from the drop-down list of approved TTB Formula IDs associated with the Plant Registry/Basic Permit/Brewer’s No. you selected above.

►Note: To remove a TTB Formula ID from the list, select the Remove link.

►Note: TTB Formula IDs only appear for electronically available Formulas. The TTB Formula ID field will display a list of approved formulas; the class/type displayed will be the approved class/type, not the submitted class/type.

►Note: You may no longer add a Lab No./Pre-Import No. or the Lab Approval Letter Date/Pre-Import Date when creating a COLA eApplication. These fields will still display for previously created COLA eApplications and on read-only pages. The information may now be entered in the restructured formula fields.

9. Select the Net Contents from the drop-down list and select the Add Net Contents button.

►Note: To remove a Net Content from the list, select the Remove link.

►Note: Repeat this step to add more than one Net Contents value, if this label will be used on multiple size containers.

14. If applicable, enter the notes to the Specialist who will be processing the COLA eApplication.

► Note: You may enter up to 2000 characters in the Notes to Specialist field.

► Note: When your application is in “Needs Correction” status, the 2000 characters limit applies to the combined total of all previous and current notes to specialist. For example, if you previously added a note of 1000 characters, you can only submit a current note of 1000 characters.

This information is also used during the approval process to understand the true size of very large labels that may have been reduced in size before they were submitted with the eApplication.

Distilled Spirit Labels
When creating an eApplication please indicate the alcohol content as it appears on the label.

Distinctive Liquor Bottle
A distilled spirits container is considered a "Distinctive Liquor Bottle" if: the spirits contents are not visible through the container OR the shape or design of the container is other than that of a "standard" or "traditional" spirits container.
You must submit photos of the front and back of Distinctive Liquor Bottles in Step 3 when submitting an eApplication for Distinctive Liquor Bottle approval.

Formulas Online.
For sale in
For Certificates of Exemption, this specifies the state for which the exemption was filed.

Formula
Corresponds with Item 11 on 5100.31 - The term "Formula" encompasses formulas, pre-import approval letters, lab analysis, and submissions formerly known as statements of process (SOP). A Formula is a quantitative list of ingredients and a step-by-step method of manufacture for alcohol beverage products (wine, distilled spirits, malt beverage) requiring approval from TTB prior to production or importation as per Industry Circular 2007-4. TTB's Regulatory Authority for such products may also be found at 27 CFR parts 4, 5, 7, 19, 24, 25, and 26. Please visit http://www.ttb.gov/formulation/index.shtml for more information. For any domestic or imported alcohol beverage products that received TTB formula approval prior to January 10, 2011, please manually enter the TTB ID number, or TTB lab number in the Company Formula #/SOP# text box. A copy of the approved formula, or pre-import approval letter must accompany the label application. If formula approval for any domestic or imported alcohol beverage product was obtained after January 10, 2011 please select the TTB Formula ID number (generated by Formulas Online) from the drop-down list of approved formulas. DO NOT submit your COLA application until AFTER you have obtained formula approval, if required.

Grape Varietals
Grape Varietals are the names of the dominant grapes used in the wine. Cabernet Sauvignon, Chardonnay, Zinfandel, and Merlot are examples of grape varieties. A Grape Varietal designation on the label requires an appellation of origin and means that at least 75 percent of the grapes used to make the wine are of that variety, and that entire 75 percent were grown in the labeled appellation (except "Vitis labrusca" grapes, such as Concord, which require at least 51 percent).

Internal User
A TTB employee accessing the COLAs system. Internal employees have access to more functionality in COLAs than External Users.

Lab Approval Letter Date
The date on which a Laboratory Analysis was approved. Some COLA Applications require that a Laboratory Analysis be completed by TTB prior to COLA filing.

Lab No.
Some imported products require laboratory analysis or pre-import letter approval in addition to label approval. When submitting an eApplication for an imported product for which you were required to obtain laboratory analysis or pre-import letter approval you must supply the corresponding TTB lab number or Pre-import number and indicate the date of the TTB letter. You must also submit a copy of the letter in Step 3 of this application. For a complete listing of products that require lab analysis or pre-import letter approval, please see TTB Industry Circular 2002-2. DO NOT submit your COLA application until AFTER you have obtained lab analysis/pre-import letter approval.
Malt Beverage Labels

When creating an eApplication please indicate the alcohol content as it appears on the label (if shown). If alcohol content is not shown on the label this field is optional.

Needs Correction

Applications in this status have been reviewed by TTB but cannot be approved as submitted. The application is returned to the submitter with a list of corrections that need to be made to either the application or to the label itself. The submitter has 30 days to make the corrections. If the application is not returned to TTB within 30 days from the date the application is returned then the status changes to “Rejected.” If the submitter makes the corrections and resubmits the application to TTB within 30 days, the status changes to “Corrected.” Applications in the “Needs Correction” status may also be “Withdrawn” by the applicant.

Net Contents

An accurate statement of the net contents of the container must either appear on the label or be blown or branded into the container.

When completing an eApplication, please indicate the size (net contents) of the container(s) on which the label(s) will be used.

You must tell us in STEP 3 if the net contents are blown, branded or embossed in or on the container instead of appearing on the label.

Distilled spirits and wine may only be packaged in the standard container sizes you see in the drop down list. There is no restriction on container sizes for malt beverages.

One COLA may be used to cover more than one size container. If this is the case, please indicate all sizes that will be used. You do not need to supply images of labels that will be used for each size if the only difference is the shape or proportionate size of the label.

Origin

This code indicates the country (or state for domestic products) of origin for each product. Each country has been assigned a unique origin code. Enter the origin code if you know it, or use the lookup feature to find it.

Permit Name

The operating name and/or owner name associated with a Plant Registry/Basic Permit/Brewer’s Number.
PIA
Privacy Impact Assessment.

Plant Registry/Basic Permit/Brewer’s No.
This is a unique number that is assigned by TTB to each business location. Examples include BW-NY-123, DSP-KY-89, BR-WI-ABC-567 or VA-I-456.
When submitting an eApplication, please select the location(s) where this product will be bottled/imported. You may only file eApplication(s) for locations that appear in your “My Profile” section of COLAs Online. Proprietors of domestic Distilled Spirits Plants and Breweries may obtain one COLA to cover multiple business locations if: the principle place of business is shown in the mandatory name and address statement on the label(s) AND the same label will be used for products bottled at each location.
A COLA must be obtained for each location where a domestic wine is actually bottled (i.e., one COLA may not cover multiple locations).
Beverage alcohol Importers may not use one COLA to cover multiple locations.
When searching from the COLAs Online search screen, you may only search for COLAs filed by the companies that appear in your “My Profile” section of COLAs Online. Either select one number, or you may select “any” if you are registered to file COLAs on behalf of multiple entities.

Preparer/Reviewer
This role provides an external user limited access for preparing or reviewing an electronic application (eApp). The user does not have the ability to submit an electronic application after creating or reviewing an eApp.

Previously Rejected Application
This applies when a COLA application was rejected and you subsequently resubmit it. If you are completing an eApplication and you submitted these labels in the past and they were rejected, you must supply the TTB ID number of the rejected application. The TTB ID number is a 14 digit number and can be found on the upper left-hand corner of paper COLAs. If this is a resubmission of a rejected eApplication, select the correct TTB ID number of the rejected COLA from the drop down list (shows only eApplications rejected in the past 30 days).

Product Class/Type
This code indicates the class and or type designation for a product. Each product has been assigned a unique class/type code. Enter the class/type code if you know it, or use the lookup feature to find it.

Product Name
You may search for COLAs by “Brand Name” OR “Fanciful Name” OR both if you select “Either.” The Brand Name is the name under which a product is sold. If the product is not sold under a brand name, the name of the bottler, packer or importer becomes the brand name. The Fanciful Name is a name that may used in addition to a brand name to further identify a product and is required for malt beverage and distilled spirit specialty products that must be labeled with a statement of composition. It is optional for other products.

Q
Qualifications
These are conditions under which the labels may be used.

R
Reasons for Correction/Rejection
These are reasons for which the COLA application needs to be corrected. If the time permitted for corrections passes without any changes from the COLA submitter, the application will automatically be rejected, and these reasons will become the reasons for which the application was rejected.
Received
Applications enter this status when they are received by TTB and remain in this status until internal evaluation begins. Once the evaluation process starts the status changes to “Assigned,” until the internal evaluation is complete.

Received Code
A three digit code number at the sixth, seventh and eighth positions within the TTB ID number that indicates how a label application was received. For instance, if the application was received electronically then the TTB ID # would contain the received code “001” at the sixth, seventh and eighth positions. Other receive codes used are “000” for hand delivered applications, “002” indicates that the application was received by regular USPS mail and “003” indicates that the application was received by an overnight delivery service such as UPS or FEDEX.

Rejected
This status indicates a final TTB action regarding a particular application. Paper applications enter this status when initial TTB review discloses that either the application or the label does not comply with Federal requirements. Electronic applications are generally returned for correction rather than rejected; however, an electronic application may be rejected if all the necessary corrections are not made to an application that was returned for correction. Electronic applications that have been returned for correction enter this status if the application is not resubmitted to TTB within 30 days. A rejection does not restrict the ability to resubmit a new application with corrected labels at a later date.

Representative ID
Third party COLA filers (consultants, label reps, trade associations, etc.) are given a unique ID number by TTB. If you wish to limit your search to COLAs that were filed by a particular representative, enter their ID number here.

Revoked
“Approved” Certificates will change to this status when TTB rescinds approval because either the labeling laws or regulations have changed rendering the Certificate invalid or the Certificate was approved by TTB in error.

Saved not Submitted
An application in this status has been either completely or partially created, but has not yet been submitted to TTB for review. TTB cannot view applications in this status. An application may only remain in this status for up to 30 days. After 30 days in this status the application is automatically deleted. If the application is submitted, the status changes to “Received.”

SDLC
Systems Development Life Cycle.

Serial Number/Serial No.
This is a unique, sequential number assigned by the COLA holder. The first two digits reflect the calendar year the application was created. The remaining digits may be a combination of letters and numbers but may not exceed four characters in length.

When creating an eApplication you must assign a sequential and unique number to each application. COLAs Online automatically assigns the first two characters, which represent the current calendar year.

Source of Product
Indicates if the finished alcohol beverage was produced in the US or somewhere else. For example wine produced in France is imported and whiskey made in Kentucky is domestic.

Special Wording
Any wording appearing on materials firmly affixed to the container other than the labels attached to the application, or any wording embossed on the container. This field may also contain translations of foreign language text appearing on the labels.
State of Exemption
For Certificates of Exemption, this specifies the state for which the exemption was filed.

Submitted By
This is the person who submitted the eApplication to TTB.
When searching by this field, you may only view eApplications that were submitted by you or by other users that have signing authority for the same companies. Third party filers may only view eApplications filed by them.

Sulfite Analysis
Any standard wine label that does not contain a sulfite declaration or contains a Sulfite-Free declaration must be submitted to either a TTB laboratory or a TTB-certified laboratory for analysis.
The results of this analysis must be included with the COLA.

Surrendered
“Approved” Certificates will change to this status when the Certificate holder voluntarily communicates to TTB that they no longer need the Certificate. Generally “Approved” Certificates do not expire, however, TTB encourages all industry members to surrender obsolete Certificates either by written communication for paper filed applications or electronically if applications were e-filed.

TTB ID
This is a unique, 14 digit number assigned by TTB to track each COLA. The first 5 digits represent the calendar year and Julian date the application was received by TTB. The next 3 digits tell how the application was received (001 = e-filed; 002 & 003 = mailed/overnight; 000 = hand delivered). The last 6 digits is a sequential number that resets for each day and for each received code.
If you know the TTB ID number, this is the best way to search for individual COLAs. The TTB ID number for eApplications is supplied to the submitter in the “Application Submitted” confirmation message. The TTB ID number can be found in the upper left-hand corner of paper COLAs.

Type of Application
A Certificate of Label Approval authorizes a product to be sold in interstate commerce and must be obtained BEFORE a domestic product is bottled or BEFORE an imported product is removed from Customs’ custody.
A Certificate of Exemption authorizes a product to be sold in the state where it was bottled and must be obtained BEFORE a product is bottled.

When completing an eApplication, select Certificate of Label Approval if this alcohol beverage will be sold within the state where the bottler is located and/or in interstate commerce (i.e., in states other than where the bottler is located).
When completing an eApplication, select Certificate of Exemption from Label Approval if you will only sell this alcohol beverage intrastate (i.e., only within the state where the bottler is located), and you wish to be exempted from the labeling requirements of the Federal Alcohol Administration Act.
Products approved under a Certificate of Exemption MUST be labeled “For sale in (state where bottling takes place) only.”

► Note: TTB does not issue Certificates of Exemption for Malt Beverages or for products imported in bottles.

Type of Product
Select either Wine, Distilled Spirit or Malt Beverage.
If you are unsure of the classification of a product, please contact the Alcohol Labeling & Formulation Division Customer Service Team at 1-866-927-ALFD or by e-mail at alfd@ttb.gov.

► Note: Sake is classified as wine for labeling purposes.
Type of Submission

If Distinctive Liquor Bottle is selected, enter the total bottle capacity before closure.

V

Vendor Code

This code was used in the past to identify organizations who were submitting COLAs. The Vendor Code is no longer in use, but may be used to search for certain historical COLA records. Plant Registry/Basic Permit/Brewer's No. is used to identify the business locations for which the COLA applications are filed.

Vendor Name

No longer in use. See "Vendor Code" for details.

W

Wine Appellation

An appellation indicates the origin of the grapes used to make the wine. Please supply the appellation of origin if it appears on the label.

A wine may be labeled with an appellation of origin that is a country, a state, or a county (or a foreign equivalent) if not less than 75 percent of the wine is produced from grapes grown in the named place.

A wine may be labeled with an appellation of origin that is an approved/recognized viticultural area if not less than 85 percent of the wine is produced from grapes grown in the named viticultural area.

An appellation of origin is generally optional information, however it becomes mandatory if the wine is labeled with: a vintage date (appellation must be smaller than a country), a grape varietal designation, OR an Estate Bottle claim (appellation must then be a viticultural area).

Wine Labels

When creating an eApplication please indicate the specific alcohol content or range of alcohol content as it appears on the label. If you are using “table wine” or “light wine” on your label to meet the alcohol content requirement, either indicate the alcohol content of the wine or enter “table” or “light” in this field.

Wine Vintage

A vintage date indicates the year in which the grapes used to make the wine were harvested. Please supply the vintage date of the wine if one appears on the label.

A vintage date may be used on the label if not less than 95 percent of the wine is produced from grapes grown in that year and must be labeled with an appellation smaller than a country.

Withdrawn

This status indicates that the applicant withdrew the application before TTB took final action. A withdrawal does not restrict the ability to resubmit a new application at a later date.
