

PRE-COLA PRODUCT EVALUATIONS FOR DISTILLED SPIRITS PRODUCTS

The following chart lists the current pre-COLA product evaluation requirements for a number of distilled spirits products. An “X” in the table indicates that a pre-COLA product evaluation of the type shown is required as a condition of COLA approval for the product and must be obtained prior to applying for label approval. A copy of the approved pre-COLA document must be submitted with the COLA application. Descriptions of the pre-COLA product evaluations are provided in the text of [Industry Circular 2007-4](#).

This chart is provided as general guidance. Particular circumstances may dictate the need for a pre-COLA product evaluation for a specific product even though no such requirement is indicated on the chart.

This chart will be updated from time to time as TTB policy changes. The date of the most recent revision is listed at the end of the chart.
