[Notice No. 931]

RIN 1512-AC32

Elimination of Application To Remove Tobacco Products From Manufacturer's Premises For Experimental Purposes (2000R-353P)

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule eliminates the requirements that manufacturers of tobacco products apply to ATF to remove tobacco products from their factories in bond for experimental purposes and maintain the approved applications for their records. In place of these requirements, manufacturers of

tobacco products will prepare and maintain records of tobacco products removed from their factories in bond for experimental purposes. In addition, this proposed rule defines "experimental purposes" under section 5704(a) of Title 26 of the United States Code.

DATES: Written comments must be received on or before December 17, 2001.

ADDRESSES: Send written comments to: Chief, Regulations Division, Bureau of Alcohol, Tobacco and Firearms, Room 5003, 650 Massachusetts Avenue, NW., Washington, DC 20226, (Attention: Notice Number 931). See the Public Participation section of this notice for alternative means of commenting.

FOR FURTHER INFORMATION CONTACT: Robert Ruhf, Regulations Division, 650 Massachusetts Avenue, NW., Washington, DC 20226; (202) 927-8210; or alctob@atfhq.atf.treas.gov.

SUPPLEMENTARY INFORMATION:

1. Background

Elimination of Application

We are proposing to eliminate the applications that manufacturers of tobacco products are required to submit for removing tobacco products in bond from their factories for experimental purposes. We believe that these applications are not necessary to protect the revenue. ATF will continue to conduct selected examinations and audits of manufacturers of tobacco products, including those who remove tobacco products in bond for experimental purposes.

In addition, manufacturers of tobacco products will continue to report the kind and amounts of tobacco products removed in bond for experimental purposes for use off factory premises. This reporting is done every month on ATF Form 5210.5 as a separate item and provides ATF an invaluable tool to monitor the operations of tobacco manufacturers in respect to such removals. Overall, this proposed rule allows greater flexibility and choice in managing our limited government resources.

The amount of taxes involved in such removals for experimental purposes is not significant. The total potential tax liability at the present tax rates for such shipments is estimated to be no more than \$500,000. This potential tax liability is not significant when compared to the total excise tax collections for tobacco products. It is less than 0.001 percent of the total excise taxes collected from tobacco products. In addition, ATF has not had any significant tax losses associated

with such removals. Also, ATF has rarely, if ever, denied an application submitted by a manufacturer for removing tobacco products in bond for experimental purposes.

This notice of proposed rulemaking eliminates the burdens imposed on the manufacturer to prepare and file applications and on ATF to take action on such applications. A manufacturer typically spends about 30 minutes to prepare, send and file each application. ATF typically spends a similar amount of time acting upon, sending and filing each application. ATF estimates that 100 of these applications are received each year.

Definition of Experimental Purposes

This notice of proposed rulemaking defines "experimental purposes" under section 5704(a) of Title 26 of the United States Code and provides additional examples of uses for such experimental purposes. However, the proposed rule retains the examples that are not considered experimental.

3. Regulatory Analyses and Notices

Is This a Significant Regulatory Action as Defined by Executive Order 12866?

It has been determined that this proposed rule is not a significant regulatory action as defined by Executive Order 12866. Therefore, a regulatory assessment is not required.

How Does the Regulatory Flexibility Act Apply to This Proposed Rule?

It is certified that these proposed regulations will not have a significant economic impact on a substantial number of small entities (see the following discussion concerning the Paperwork Reduction Act. Accordingly, a regulatory flexibility analysis is not required. Pursuant to 26 U.S.C. 7805(f), this proposed regulation was submitted

to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business. No comments were received.

Does the Paperwork Reduction Act Apply to This Proposed Rule?

Yes. The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection(s) of information should be sent to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms (ATF), Office of Information and Regulatory Affairs, Washington, D.C., 20503, with copies to the Chief, Document Services Branch, Room 3450, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue, NW., Washington, DC 20226. Comments are specifically requested concerning:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Alcohol, Tobacco and Firearms, including whether the information will have practical utility;
- The accuracy of the estimated burden associated with the proposed collection of information;
- How the quality, utility, and clarity of the information to be collected may be enhanced; and
- How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology.

The collection of information in this proposed regulation is contained in 27 CFR 40.232(e). ATF uses this information to verify the kind and amount of tobacco products removed in bond from the premises of manufacturers for experimental purposes. In addition, ATF may use this information to determine that the persons to whom such removals are made are using the tobacco products for legitimate experimental purposes and that the tobacco products are properly destroyed or returned to the premises of a manufacturer following their experimental use. If such tobacco products are not destroyed or returned to the premises of a manufacturer, ATF will use this information to collect the taxes due.

The collection of information is mandatory. The likely respondents may include small businesses or organizations. The estimated annual

burden per respondent will vary depending on the number of shipments that manufacturers of tobacco products remove from their premises in bond for experimental purposes. Estimated total annual recordkeeping burden under this proposed rule is 1 hour since the records to be maintained are customary and usual for private and business purposes. Estimated average annual burden per respondent and/or recordkeeper is less than 1 hour. The estimated number of recordkeepers is 165.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

“Plain Language” Changes

During the revision of the regulations in this document, we also tried to simplify and clarify the language of the affected section of the regulations. Any suggestions for improving the readability of these regulations may be submitted as comments to the cross-referenced notice of proposed rulemaking.
