

TTB Distilled Spirits Formulas and Labels What is the Connection?

Key Objectives

Explain connection between a formula approval and label approval.

Provide examples of approved labels with corresponding formula approval.

Hear from you!

Notice:

- This information is being presented to help the public to understand and comply with the laws and regulations that the Alcohol and Tobacco Tax and Trade Bureau administers
- It is not intended to establish any new, or change any existing, definitions, interpretations, standards, or procedures regarding those laws and regulations
- In addition, this presentation may be made obsolete by changes in laws and regulations - please consult the regulations for the most current regulatory requirements
- Sample documents (such as records, returns, and labels) are for illustrative purposes only and contain fictitious data

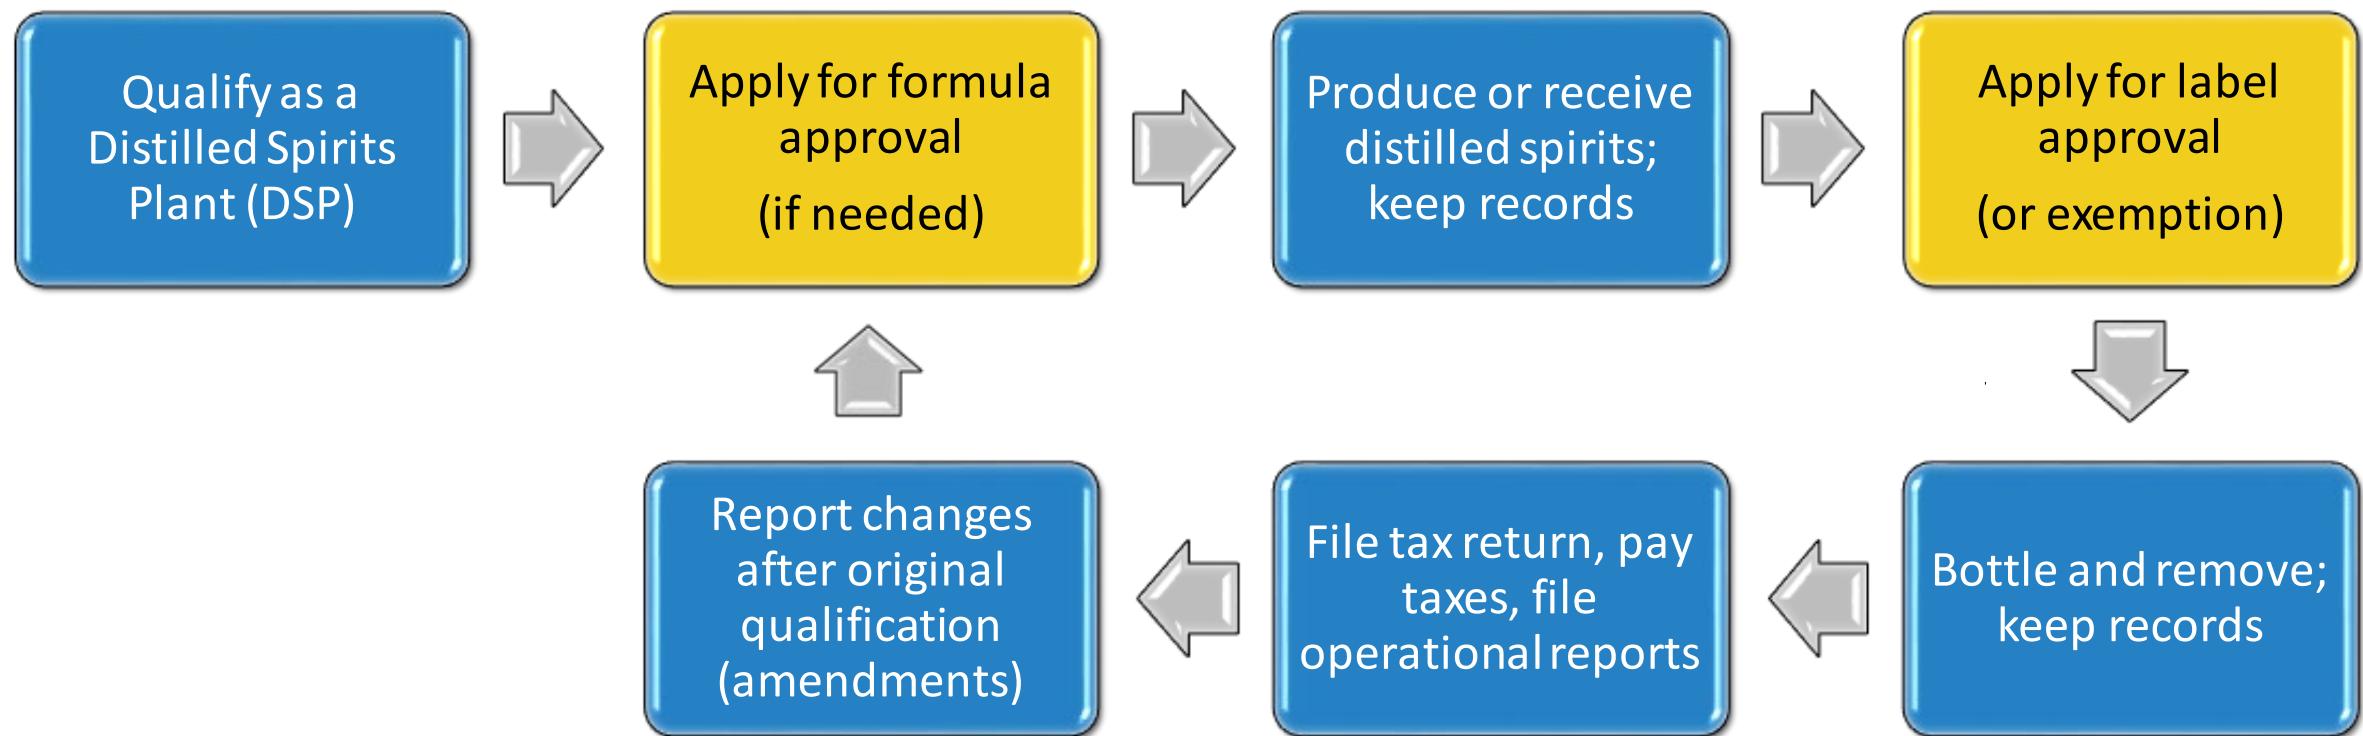

Background

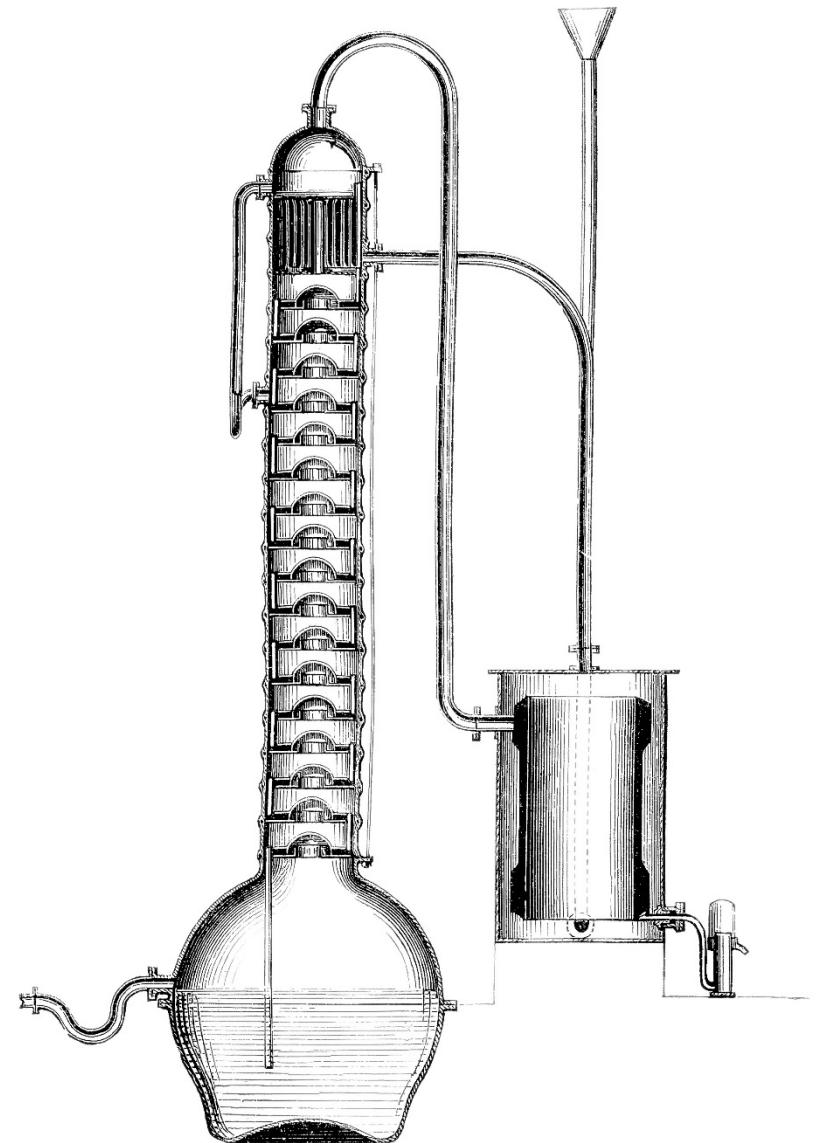

- Increased error rates
 - Formula approvals
 - Label approvals
- Misunderstanding of Statement of Composition/Class Type
- Connection between Formula & Label Approval

Typical TTB Touchpoints for Beverage Distilled Spirits Industry Members

Formulas Overview

What is a Formula?

- A formula is the recipe for your distilled spirit product
- It must include:
 - a total yield, or batch size
 - a list of all ingredients by quantity
 - a description of how the product is made
- In some instances a sample of the product must also be submitted to TTB for laboratory analysis
- See [Formula Basics](#) page on TTB.gov

When is a Formula Required?

Generally, formula approval is required when a distilled spirit contains:

- Artificial sweeteners
- Carbonation
- Compounded/artificial/imitation flavors
- Ingredients derived from hemp
 - See webinar presentation: [Using Hemp and Hemp Derivatives in Alcohol Beverages](#)

In addition, certain classes/types of distilled spirits always require formula approval

What TTB Looks For

- Class and Type – Is the base alcohol produced according to the stated standard for the specified class and type?
- Flavors and Flavor Ingredient Data (FID) sheets
- Restricted and prohibited ingredients
- Colors
- Food safe ingredients under FDA regulations (including Generally Recognized As Safe or GRAS ingredients)

Helpful Hints

- Supply a quantitative list of ingredients
- Provide a complete method of manufacture
- Indicate at what stage flavors are added to the product
- Flavor Ingredient Data Sheets (FIDS) should include a TTB number, a Flavor Product Number, and the TTB Approval status (Nonbeverage Products Lab Approval)
- Provide the common name and scientific name (genus and species) for any unusual herbal ingredients
- Ensure that ingredients are considered GRAS or otherwise approved by the FDA

Common Reasons Formulas Are Returned for Correction

To speed up the formula approval process, don't forget:

Ingredient Specification Sheet (Spec Sheet) for ingredients composed of more than 1 component

Limited Ingredient Calculation Worksheet when compounded flavors are used

Flavor Ingredient Data (FID) when compounded flavors are used

What Should I Do After My Formula is Approved?

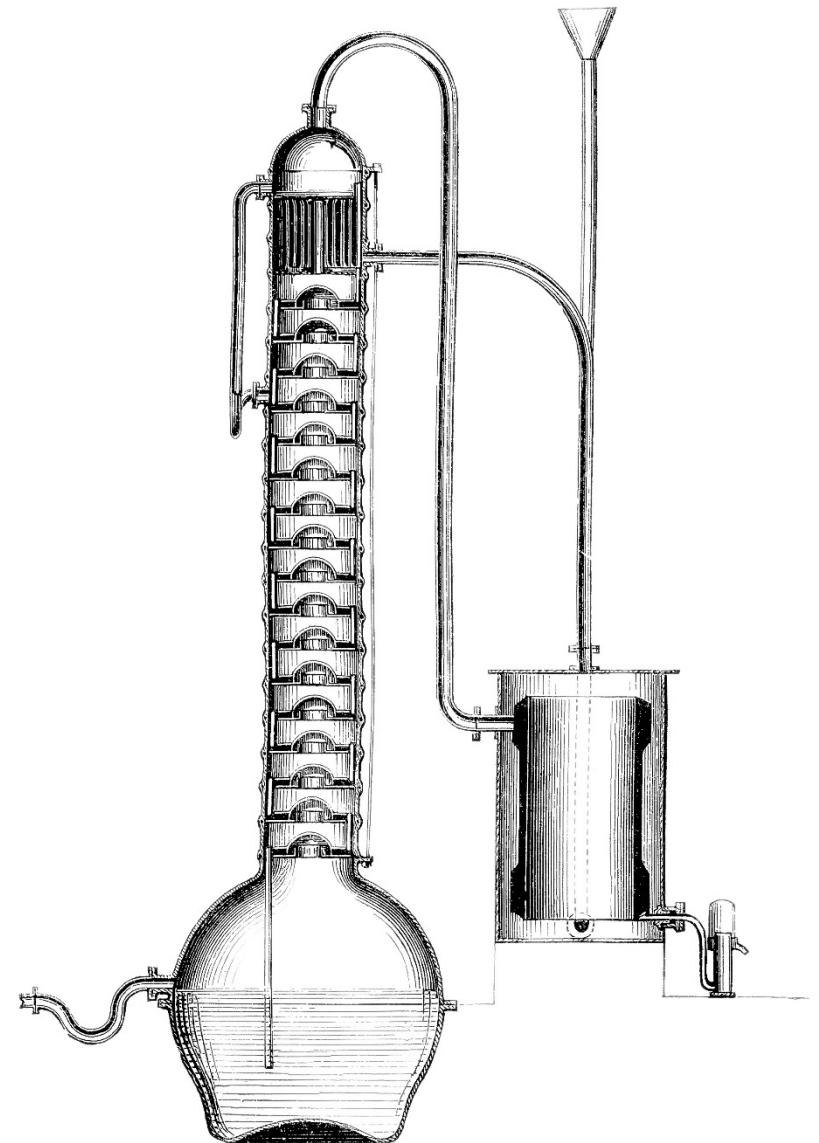

- In the RESULTS tab on the approved formula, TTB will provide a simple, general statement of composition for the product label, such as:
 - *Vodka with Natural Flavors and Artificial Color*
- You can either use this generic statement of composition to meet the requirement for the class/type statement on the label, or create a more specific labeling statement that discloses the specific flavors as well as the coloring agent, such as:
 - *Vodka with coconut and cinnamon, coffee flavor, and caramel color*

What Should I Do After My Formula is Approved? (Cont.)

- Have formula information available when designing your label
- List your formula ID on your application for label approval (or exemption)
- More information can be found: [TTBGov – Distilled Spirits Example Formulas TTB G 2017-9](#)

Labeling Overview

Label Approval – What is a COLA?

A **C**ertificate **o**f **L**abel **A**pproval signifies that a product label that was submitted to TTB complies with the applicable labeling requirements found in TTB regulations and policy

A COLA is required for each product sold in interstate commerce (product = distinct brand/distinct product designation/distinct label)

COLAs must be obtained by:

- importers of bottled products, i.e., products imported in consumer containers
- U.S. bottlers of domestic products and products imported in bulk and bottled in the U.S.

Is a COLA Always Required?

- COLAs are required for each product that will be sold or otherwise introduced into interstate commerce (including products imported in bottles)
- If a distilled spirit product will only be sold in the state where it is bottled, the bottler may instead obtain a Certificate of Exemption from Label Approval
- Label must include statement, **For sale in [name of state where bottled] only**

27 CFR 5.23

At What Stage do I Apply for Label Approval?

Domestically bottled – COLA must be obtained prior to bottling/canning the distilled spirit

Imported in bottles – COLA must be obtained prior to removal from Customs custody

Mandatory Information

In the Same Field of Vision

- Brand Name
- Class/Type
 - Fanciful Name (if applicable)
 - Statement of Composition (if applicable)
- Alcohol Content

Anywhere on the Label

- Bottler's or Importer's Name and Address
- Net Contents
- Health Warning Statement
- Country of Origin (if imported)

27 CFR 5.63

Mandatory Information (if applicable)

May appear anywhere on the label:

- Sulfite declaration
- Coloring or flavoring material
- FD&C yellow #5
- Cochineal extract or carmine
- Treatment with wood
- Percentage of neutral spirits
- Commodity statement
- Statements of age
- State of distillation

27 CFR 5.63

Class and Type

There are 12 standards of identity:

1. Neutral Spirits (Vodka)
2. Whisky
3. Gin
4. Brandy
5. Blended Applejack
6. Rum
7. Agave Spirits (e.g., Tequila)
8. Cordials and Liqueurs
9. Flavored Spirits
10. Imitations
11. Geographical Designations
12. Distilled Spirits Specialty Products

27 CFR 5.141

Class and Type (Continued)

- If product does not fall under one of the other standards of identity, it is a distilled spirits specialty product and must be designated in accordance with trade and consumer understanding, or, if no such understanding exists, with a distinctive or fanciful name appearing in the same field of vision as the statement of composition.
- For cocktails, a statement of added colors and the class/type of the spirits is sufficient:
 - e.g., Margarita made with tequila, triple sec liqueur, and FD&C Yellow #5

27 CFR 5.156

Additional Information

The label may contain information other than the mandatory information

- Must be truthful, accurate, and specific
- May not conflict with or qualify mandatory information
- Must comply with the corresponding sections of the regulations

27 CFR 5.56

Translating Formula to Label

Label information must be supported by formula information, which can be viewed in:

- Results Tab
- Formula Tab
- Docs/Links Tab

Determined by formula:

- Class and Type
 - Statement of Composition (if required)
- Alcohol content
- Mandatory disclosures (if required)
